

I am very concerned about the effect that communication towers have on migratory birds. I request that you please study this issue further. Please:

- begin a systematic review of communication tower and bird mortality issues;
- institute a research program, funded by the communications industry, to identify tower placement, design and lighting conditions that result in bird mortality;
- undertake environmental reviews of all existing towers to assess their placement and design with regard to migratory bird impacts;
- require that all proposed towers be subjected to rigorous environmental reviews;
- and implement immediate protections based on existing knowledge, such as the voluntary tower siting and placement guidelines developed by the U.S. Fish and Wildlife Service.

Thank you very much. I am all for human progress, and I also desire to protect our animal and bird species and the environment.
